COURSE DESCRIPTION	
<p>The course studies corporate financial decisions in an international setting. We start with basic concepts of international financial markets. These concepts include the global foreign exchange market and its operations, the international capital market, the global bond market, the international equity markets, and cross-border portfolio investment. Then, we discuss corporate financial decision issues including risk management, investment, capital structure, capital budgeting, and cash management in the global context.</p>	
COURSE OBJECTIVES	
<ol style="list-style-type: none"> 1. the international financial environment, where we study the core of the material on foreign exchange. Topics to be discussed include foreign exchange markets and international parity propositions 2. currency risk management, where we study how the exchange rates volatility creates risks for corporations and how these risks can be managed 3. international portfolio investment and international corporate finance, where our focus is on multinational capital budgeting. Students will be exposed to a broad range of topics, including some of the latest developments in global financial markets.
